

Mobile Ductless Filter Hood

W.MVS / W.MVS850

Perfect for situations where a ducted system is impractical or uneconomical, the Woodson Mobile Ventilation Station is your mobile kitchen solution.

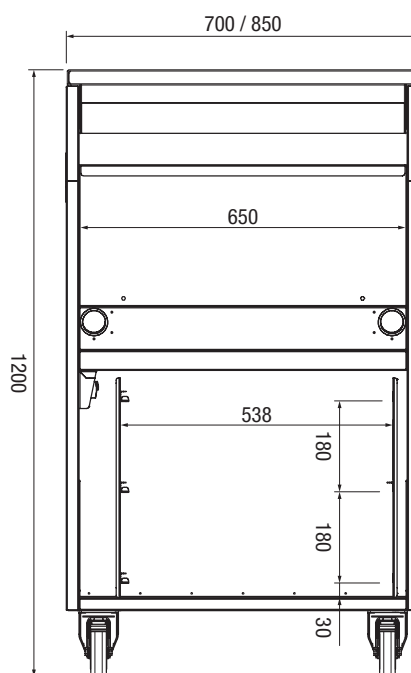

Product Information:

- Unique ductless design using three-way filtering system including stainless steel baffle, polyester & activated carbon filters to provide clean, safe & odour controlled discharge from suitable countertop equipment
- Ideal for kiosk operations or where a ducted system is impractical or uneconomical Easily removable filters for simple cleaning, with 2 filters being dishwasher safe
- Comply with the performance requirements of the NCC and relevant Australian Standards for use with electrical cooking equipment under 8kW, including fryer appliances, when operated and maintained in accordance with their manual
- Have been independently tested and certified to meet the strict air quality requirements of the ANSI/UL710B:Recirculating Hood Systems and the EPA test method 202, ensuring grease laden effluent in the exhaust airstream does not exceed an average of 5mg/m³ during an 8 hour test
- Performance certificate available (exclusive to Stoddart ductless hoods), contact your Stoddart representative for more details
- Air is drawn down the rear of the unit, filtered, then returned back to the kitchen via base of unit
- Storage area below cooking zone with adaptable rack slides
- With lockable swivel castors to front and fixed castors on rear of unit for extra mobility
