

Rinse-O-Matic®

Model: VM1420

Powerfully Rinses Blender Containers, Saving Time and Money

No more rinsing containers by hand or letting the water run; the Rinse-o-matic® is the more efficient way to rinse out any 2.0 litre or smaller blender container in seconds! Just place the container upside down and the high water pressure rinses residue away, saving you time and money.

Features

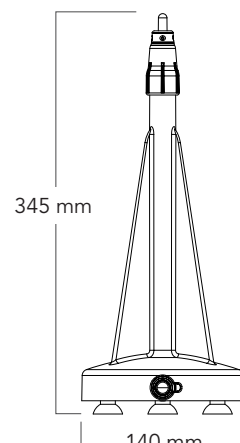

- Easy installation – in minutes! Simply connect the standard hose to your tap. Everything you need to get started is included in the box. No electricity or expensive plumbing tools needed.
- Operates entirely on cold tap water pressure
- Powerful spray forcefully removes stubborn residue, including the difficult to reach section under the blade
- Only sprays when pressure is applied for ease-of-use
- Rinses containers 2.0 litres or less from most manufacturers
- Durable ABS plastic construction is virtually unbreakable and verified to perform more than 1,000,000 cycles.
- Engineered for limited container movement during rinsing. Robust suction cups prevent movement in your sink during operation.
- Lower water and electricity bill as Rinse-o-matic does not require electricity for it to operate and uses only the amount of cold water that is needed.
- Fits in standard size sink, with quick disconnect adapters to allow you to move it from sink to sink.
